SIVET PROSPECTUS

enhance your
career with our TVET programs

THE SIYA
INSTITUTE OF
VOCATIONAL
EDUCATION
AND TRAINING

~BUILDING COMPETENCIES~

FOUNDERS' FORWARDS

Access to education is a sacrosanct constitutional right for every Namibian citizen. This noble responsibility is bestowed upon the government to ensure delivery of education services to its population in an equitable manner. Despite the tangible efforts by government in giving due diligence to the agenda of citizenship education through continuous development of mechanisms in which education with regard to social rights and responsibilities, and the development of soft skills, could be imparted to young people alongside employment skills education, it is certainly not entirely upon state alone. It is a shared responsibility for every able citizen to fulfil this fundamental obligation.

We took cognisance that Technical Vocational Education and Training (TVET) is a national key priority under the Ministry of Higher Education, Technology and Innovation and it is on this basis that the Siya Institute of Vocational Education and Training (SIVET) was founded. Its mandate is aligned to the national strategic plans on TVET, as well as on the national and international developmental frameworks such as the National Development Plan 5 (NDP-5 with NDP- 6 in progress), the Harambee Prosperity Plan II, Vision 2030, Agenda 2063 and the Sustainable Development Goals.

With a large young population in the country, we devote our energies and resources to tackle gaps in education geographic spread, low levels of skills among young people, and low economic growth rate. SIVET is steadfast with breaking barriers in ensuring access to quality post-secondary education for young people and other class of individuals, through well-coordinated TVET programs.

As a young institution of learning, we understand the plight of the communities' knowledge economy and we are determined to bring you the best career oriented educational and training programs which are designed to suit your needs and demands of the industries. We are committed to contributing to the transformation of the national economy with a profound influence on economic development and socio-cultural dynamics of our communities.

Be sure to join this dynamic institution of young and vibrant academic instructors/trainers, who are dedicated to brighten your career and unlock your potentials. We wish you prosperity and excellence in your study endeavours at SIVET.

ABOUT SIVET

INSTITUTION OVERVIEW

The current global economic climate and scarcity of resources imposes challenges on education and skills development needs of young people in many developing and middle class countries, and Namibia is of no exception. The focus of the Millennium Development Goals (MDGs) on universal primary education (UPE) contributed towards improving enrolment rates at that level, which consequently increased enrolment at secondary level. However, pursuant to a relatively high drop-out rates at junior and secondary levels, there exists a broad gap in transition from secondary to any form of formal post-secondary education, including both technical and vocational education and training (TVET) and higher education. In countries with relatively large population of young generation and limited resources, young people are exposed to street crime, drugs, psychological issues, and conflict.

The challenge for many of us is how to transform these young people into useful resources which can contribute towards the economic development process of their respective communities and help them become responsible citizens.

The Siya Institute of Vocational Education and Training (SIVET) is a privately owned technical vocational education and training, working towards skills development and entrepreneurship in Namibia. Situated at the heart of the marginalized communities of the Ovazemba and Himba people in the Omusati Region, North-West of Namibia, our institution is committed to providing

variety of vocational oriented courses through multi-disciplinary learning platform with endless opportunities to groom skills and help young people build their career and prepare them for the industry.

SIVET's mandate is aligned to the strategic path of the Namibia Training Authority, who in turn has prioritised the provision of effective and efficient TVET services as a key deliverable under its current five-year Strategic Plan. SIVET further recognises Namibia's Fourth Industrial Revolution (4IR) dream as valid, and hence strives to make tangible contributions towards the realization of Namibia's vision of becoming an industrialized nation.

OUR MANDATE

To provide effective demand-driven and inclusive Technical Vocational Education and Training (TVET) which contribute to improving employment and entrepreneurship opportunities in the formal and informal labour market for all, towards achieving positive local and national economic development.

VISION

To become the premier technical vocational education and training provider through sustainable community based research, innovation and excellence by 2030.

MISSION

To develop a highly successful, and value-driven vocational institution & training centre which provides quality and market responsive life-long learning technical vocational education and training for the enhancement of community development and uplifting.

ABOUT SIVET

OUR VALUES

Competence: We strive to achieve the highest quality in all our programmes, researches, services and activities through zeroed competencies.

Innovation: We uphold creative thinking and recognize the value of the impact of each member of our community towards the innovative future.

Discipline: We embrace a culture of uncompromising discipline. Seeing that discipline is the mother of all success in any forward moving organization, without which failure is inevitable.

Accountability: We accept responsibility for our mandate and actions and will deliver on our promise to society.

Collaboration: We take cognisance of the importance of continuous cooperation with our partners and stakeholders.

Equity: We hold a strong stance in education for all. This stems from the value of fairness, diversity embracement, tolerance and impartiality in knowledge economy.

OUR CORE BUSINESS

Our core business is Training - providing quality and competitive technical vocational education and training to every student coming through the centre's gates of success.

STUDENT SUPPORT

GENERAL INFORMATION

Internship opportunities

Industrial exposure for trainees is an integral part of Technical Vocational Education & Training. The duration for trainees' job attachment is normally six months. During these time trainees spend time at a company refining their practical skills in a particular trade by putting their centre-based theory lesson and practical's into real practice. The Centre will continuously work closely with various industrial stakeholders to create attachments opportunities for its students where and when possible.

Trainee Representative Council (TRC)

SIVET trainees annually elect a Trainee Representative Council, a trainee leadership body which represents the interests of trainees in order to enhance proper functioning of the centre and promote democratic participation of trainees by serving as a mouth piece for the trainee population. The TRC serves as the link between the trainee population and the SIVET Management. The TRC is represented on the SIVET advisory Board by the President.

Sport and Recreation

Sports and recreation helps forge long-lasting, supportive bonds as well as boosts emotional and physical well-being for students. SIVET offers you many options to get together with fellow trainees to play sports and go on adventures. We fully subscribe to the view that regular sporting and exercise builds a health body and mind. On that premise, SIVET offers various sports codes of which facilities (sports fields) are available on our campus.

- Soccer (Male & female)
- Netball
- Volleyball

It is the vision of the Centre to have as many sport codes, cultural groups and musical groups/Choirs, through which student can participate and by extend earn with the Centre a significant number of sports accolades.

Hostel Boarding

The Centre have limited hostel accommodation facilities on campus for Full-time boarding trainees at a cost of N\$ 350.00 per month for the duration required per program enrolled, the fee includes water and electricity.

Uniforms and Training Manuals/Modules

Trainees are required to bring along own Safety Boots (per safety standards of the Centre), and basic stationaries.

Manuals are provided for by the Centre at a fee.

The Centre will provide Overalls branded with the institution's colours at a fee.

Other PPEs such as Helmets, Goggles, and Gloves will be provided by the institution.
